

Easy Problems (Traversal): Level 1

1. Average of Array.py

```
arr = [10,22,1,33,555,2222]

# average = total_sum / total count of num

sum = count = 0
# count = 0
for i in arr:
    sum = sum + i

    count = count + 1

    average = sum / count

print([average])
```

3. Count Even Numbers.py

```
arr = [10,22,1,33,555,2222]

# Formula : Divisible by 2, remainder is 0

even_count = 0

for i in arr:
    if i % 2 == 0:
        even_count = even_count + 1

print([even_count])
```

5. Min and max.py

```
arr = [1, 4, 3, 5, 4, 8, 6]

minimum = maximum = arr[0]

for i in arr:
    if i > maximum:
        maximum = i
    elif i < minimum:
        minimum = i

print([minimum,maximum])
```

7. find minimum.py

```
arr = [10,22,-1,33,555,2222]

minimum = arr[0]

for i in arr:
    if i < minimum:
        minimum = i

print(minimum)
```

10. sum of array.py

```
arr = [10,22,1,33,555,2222]

sums = 0

for i in arr:
    sums = sums + i

print(sums)
```

2. Check Element Exists.py

```
arr = [10,22,1,33,555,2222]

target = 555

for i in arr:
    if i == target:
        print(target)
        break
else:
    print("Target was not found in the array")
```

4. Count odd Numbers.py

```
arr = [1,3,5,7,9,20,22,1,33,555,2222]

# Formula : Not Divisible by 2, remainder is 1

odd_count = 0

for i in arr:
    if i % 2 != 0:

        odd_count = odd_count + 1

print([odd_count])
```

6. count elements.py

```
arr = [10,22,1,33,555,2222]

target = 555

for i in arr:
    if i == target:
        print(target)
        break
else:
    print("Target was not found in the array")
```

8. find_max.py

```
arr = [200,10,22,55,4444]

maximum = arr[0]

for i in arr:
    if i > maximum:
        maximum = i

print(maximum)
```

9. print_array.py

```
arr = [10,22,1,33,555,2222]

for i in arr:
    print(i)
```

11. linear search.py

```
arr = [10,22,1,33,555,2222]

target = 22

current_index = 0

found = -1

for i in arr:

    if i == target:
        found = current_index
        break

#Linear Searching by moving the index position 0 --> 1.2.3.4. until it's found
current_index = current_index + 1

print(current_index)
```
