

HashMap/Hashset Level 1 - Foundation

1. Frequency of Elements

```
nums = [1,2,2,3,1,2]

freq = {}

for i in nums:

    freq[i] = freq.get(i,0) + 1

print(freq)
```

2. Count Characters

```
text = "programming"

freq = {}

for ch in text:

    freq[ch] = freq.get(ch,0)+1

print(freq)
```

3. Contains Duplicate

```
nums = [1,2,2,3,4]

seen = set()

for i in nums:

    if i in seen:

        print(True)

    seen.add(i)
```

4. Find Unique Element

```
nums = [1,2,2,3,1,2]

freq = {}

for i in nums:

    freq[i] = freq.get(i,0) + 1

for i in freq:

    if freq[i] == 1:

        print(i)
```

5. First Repeating Element

```
nums = [1,2,2,3,2]

freq = {}

for i in nums:

    freq[i] = freq.get(i,0) + 1

for i in freq:

    if freq[i] > 1:

        print(i)
```

6. Count Distinct Elements

```
nums = [1,2,2,3,1,4]

unique = set()

for i in nums:

    unique.add(i)

print(unique)
```
